Run report: E5 session e5_combined_n17_t0

2026-10-11T17:27:31Z to 2026-10-11T17:43:15Z UTC. research/isogeny_conductor_gap_round3_20261011, lead E5.

Spec specs/e5_combined_n17_t0.json; **session** ECBS1h05f404b1f89b at commit 1a63ec419 (git_dirty false); run with `ecbench run --wait`, audited with `ecbench verify --replay 12`: ok, 8 of 8 verified, 8 replays reproduced, 0 problems. **Host:** cloud container, Xeon @ 2.80 GHz; isolation earned L1 on 6 records and L2 on 2 (the spec asked for L2).

Workload: icv1-f2m17-tm101-00378d4e (a = 1 Koblitz curve over $F_{2^{17}}$, h = 2), target index 0. **Arms:** rho.negation; ic.pipeline on binary-subspace:dimension=8 with the blind F4 descent, the all-lifts descent and the combined descent (f4-f2). 8 runs requested, 8 verified; no warm-up, 2 measured rounds.

Derived: combined ÷ blind F4 solver operations, paired by round: 492× (round 0) and 529× (round 1). Solver operations are the solver's own count; the session's S leaves them unpriced (lower bound).

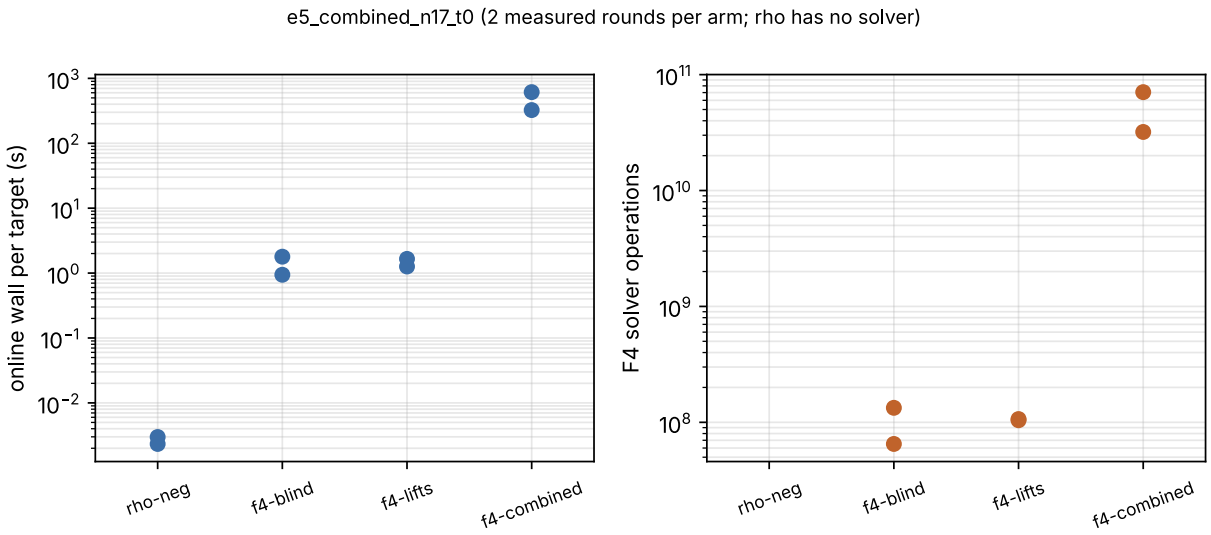

Figure 1: Session ECBS1h05f404b1f89b: online wall per target and F4 solver operations per run, 2 measured rounds per arm (log scales). Records sessions/e5_combined_n17_t0/records.jsonl.
