N83 cold difference bounded on sixteen points

K1104/root11 and K1120/root11 were compared on 16 fresh public points.

The paired 95% mean interval crosses zero, so the frozen selector remains null.

All 64 IC and 16 same-point rho computations passed independent replay.

K1104 mean cold process	119.847 s
K1120 mean cold process	119.701 s
Mean K1104 minus K1120	145.454 ms
Paired 95% interval	[-92.776, 383.684] ms
Selected candidate	null
