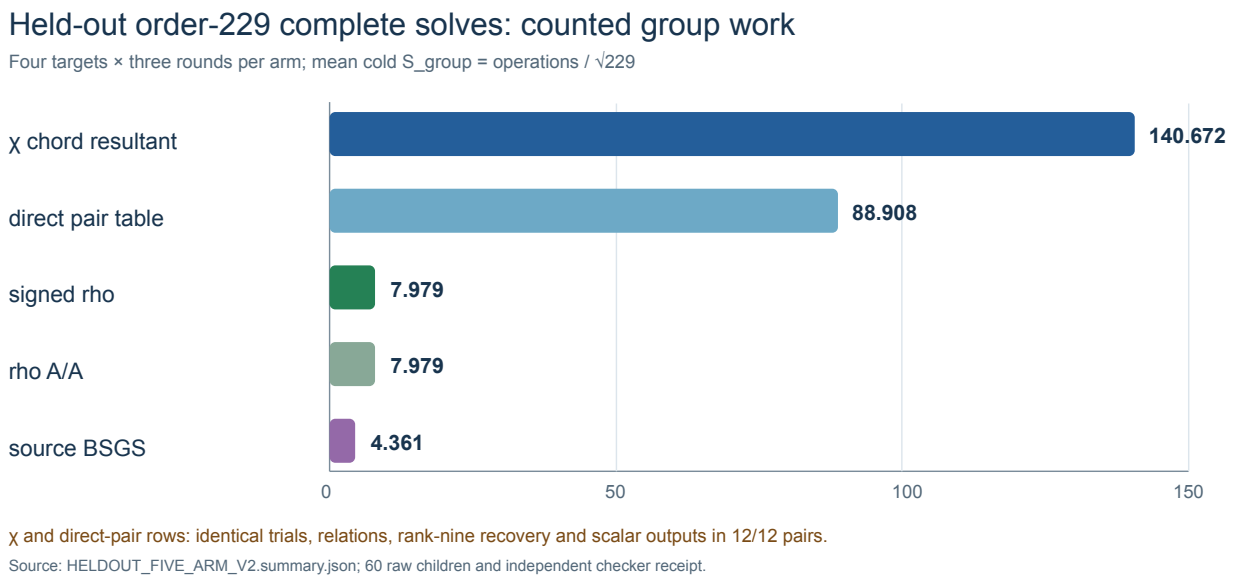
Run receipt: held-out order-229 five-arm panel

Run ID: `different_j_resultant_20261016/heldout-five-arm-v2`



Four unseen public targets, five arms, three rotated rounds: 60 of 60 children completed. The independent checker replayed 60 scalars and 332 relation witnesses. Each child had a 300-second limit and observed RSS below 512 MiB; Darwin did not enforce the memory ceiling in advance. The complete raw record, exit status, meter and SHA-256 manifest are beside this report. V1 is preserved with its invalid control setup charge. V2 is the corrected ledger.
