Index-calculus changes measured 14–15 October 2026 against their incumbents
genus-3 GHS: 2LP vs full base (q=2^18)
genus-3 GHS: SGE+Wiedemann LA (q=2^20)
k=4 F_p⁴: D4 Y-line vs plain S4 ladder
k=4 F_p⁴: D4 weighted S5 vs C8 five-unknown
k=4 F_p⁴: first-dependency stop
k=4 F_p⁴: double large primes (tuned)
Koblitz: free relations (production)
Koblitz: linear-row harvest, (23,12) m2
Koblitz: cyclotomic base vs compact orbit (K1)
Koblitz: trace-zero pre-filter
Koblitz: stride-renew targets (n=13)
prime PKM: isogeny tower vs plain (worst seed)
binary: MITM pair-table oracle, l=8
all: filter + Wiedemann LA vs previous
