Run report: ell8209-q29

Run report: ell8209-q29

Session: ECBS1h2686905ba61d. Spec: ../../specs/ell8209-q29.json. Exact launch/audit commands: ../../run_sessions.sh.

Host: INTEL(R) XEON(R) PLATINUM 8573C, x86_64, environment ECBENV2h64104171e621. Binary SHA-256: 429de171c022b71427759b47d411d8f8d6dd52e9f2daa819de23f4a67536194a. Recorded revision: 7df956fd7f97dad09c96dab12772b2b4cb24146f; dirty: false.

96 records: 48 measured, the rest retained warm-ups. Measured failures: 0. Eight independent one-target workloads on each fixed curve; one measured round, one warm-up. All runs are cold. A/A matches: 16 pairs, 0 mismatches.

Audit OK: true; 96 verified records; 48 exact measured replays. This is same-host replay, not independent-host validation.

Dots are native-analyzer means; lines are observed ranges, not confidence intervals. No wall figure is interpreted. Raw records: ../../sessions/ell8209-q29/records.jsonl; their SHA-256: cb0e0fb9474108d8e12b4d659c919132af9701a7bfdb0b8b3629f2159daaed98. All exact run IDs and phase means are in ../../analysis.json. No session file was edited.

Exact representation identities

- crater: EC1P29Ccmcraterhae811e480428; urn:ec-record:1:sha256:ae811e480428595a3ede9019006aaea4d8049d984502ad3bb8fb262803400fd0. Full hash preimage and subgroup/generator are in ../../analysis.json. Metadata identity is not an additional mathematical certificate.
- floor: EC1P29Ccmfloorh12dba562e91a; urn:ec-record:1:sha256:12dba562e91af4e2ddbe56f3ccea704568d87f5df115e104e2edc1b863923b1b. Full hash preimage and subgroup/generator are in ../../analysis.json. Metadata identity is not an additional mathematical certificate.

Unpriced native work, memory and model-dependent primitive prices remain explicit in each record. Counted S and IC/rho quotients do not establish complete-cost advantages. No isogeny was computed or priced; no structural hardness or transport inference is made.
