Cold one-target frontier: every measured IC arm is above rho
PKM tower + rootfind, 28-bit
PKM tower + rootfind, 20-bit
prime pair table, 20-bit
prime abscissa base, 20-bit
compact orbit, Koblitz n=17
compact orbit, Koblitz n=23 a=0
matrix F4/F5, K13 (vs rho-negation)
Frobenius pair table, Koblitz n=17
rootfind-negfold m=2, K13 (vs strong rho)
