Run report: d43-ell2033609

Run report: d43-ell2033609

Session: ECBS1ha6b77e51c13e. Spec: ../../specs/d43-ell2033609.json. Exact launch/audit commands: ../../run_sessions.sh.

Host: Apple M4 Pro, aarch64, environment ECBENV2h59034d4cd61b. Binary SHA-256: 9f6a05e86f49711383557ca4a449e6e41773bad2b2672ed08e297f26513b55c3. Recorded revision: be456ef517aa255f98c02c3fe94b33670517a9e0; dirty: false.

64 records: 32 measured, the rest retained warm-ups. Measured failures: 0. Eight independent one-target workloads on each fixed curve; one measured round, one warm-up. All runs are cold. A/A matches: 16 pairs, 0 mismatches.

Audit OK: true; 64 verified records; 32 exact measured replays. This is same-host replay, not independent-host validation.

curve	role	arm	mean counted S	observed range	lower bound	isolation levels

Dots are native-analyzer means; lines are observed ranges, not confidence intervals. No wall figure is interpreted. Raw records: ../../sessions/d43-ell2033609/records.jsonl; their SHA-256: 7cbf8f294974e55dc73a9b0b59cf5783f08e8a0848add70902cd7d0f2cda0f1a. All exact run IDs and phase means are in ../../analysis.json. No session file was edited.

Exact representation identities

- crater: EC1P46Ccmcraterhd4623415d5f6; urn:ec-record:1:sha256:d4623415d5f680a2ba389bb0326fa0b512f5be3627fa2c9cbfa6d8b8404a4f94. Full hash preimage and subgroup/generator are in ../../analysis.json. Metadata identity is not an additional mathematical certificate.
- floor: EC1P46Ccmfloorhb290644bb788; urn:ec-record:1:sha256:b290644bb7886f02528ca572011e3bbe3d627f4ae113ccc5330afc7f98ad2bf6. Full hash preimage and subgroup/generator are in ../../analysis.json. Metadata identity is not an additional mathematical certificate.

Unpriced native work, memory and model-dependent primitive prices remain explicit in each record. Counted S and IC/rho quotients do not establish complete-cost advantages. No isogeny was computed or priced; no structural hardness or transport inference is made.
