ECDLP transfer diagnostic: known-case outcomes
Typed path + exact subgroup
4-state evidence obligations
Necessary screens
dimension / order / Frobenius / field
necessary filter only
order + Frobenius fail
Hard transfer gate
map + injectivity + recovery
compatible surface polynomial
VALID TRANSFER: unknown
E0 -> E1 x E1
VALID TRANSFER: refuted
subgroup map remains open
torsion gate fails
Solver and complete cost
then scaling and novelty
genus-3 cover C -> E
VALID TRANSFER: unknown
(n=83 pullback not replayed)
Z/rZ -> Z^m
VALID TRANSFER: refuted
all transfer gates pass
all transfer gates pass
F_101 quartic image
VALID TRANSFER: supported
GF(2^83) E0 -> E0 x E1
VALID TRANSFER: supported
No case supports a modeled or
measured computational advantage
