N83 sixteen-point precision run

Tier 1 cloud instance; sealed public points; one fresh process per candidate repeat.
Each point: K1104 A/B, K1120 A/B, and one independently solved same-point rho.
The provider ZIP, all extracted members, 64 IC arms and 16 rho solves were replayed.
Cold process includes base and index setup, rank, and target work; online is separate.

Provider run	38970960376
Provider ZIP SHA-256	559578cd386693ce3681827ba3a9f192bd99be7ca72920fc35734cf515fd844d
Bound ZIP result members	645
Evidence	PASS_INDEPENDENT_REPLAY
Selection status	BOUNDED_UNKNOWN
