orbit-heldout: ecbench follow-up

Session ECBS1h0a3c84bf9ac2

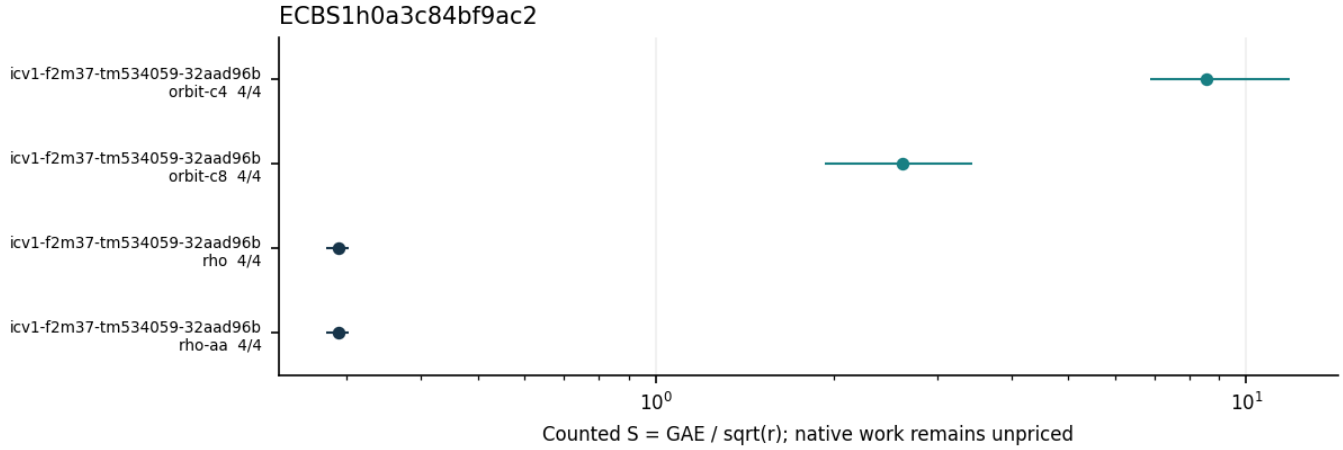

Source 0cbc86b2c828f1aa7fae62282913cce9ea6e099d

Binary 50a5739fadcb08ab8f170d4fe03ba3427fb0fd387c1a5918843fcda4d68ff1fb

16 attempts; 16 verified recoveries; 16 exact standard replays.

Fresh public single-target workloads, seed20261015. Cold setup repeated; no planted scalar. Host ECBENV2h96c931cc33fa, L0; wall times inadmissible. Exhausted/error outcomes have a separate native replay.

Points and ranges use verified runs only: native mean and observed min/max, not confidence intervals. Failed work remains in the resource vectors. Count quotients do not bound full-cost ratios. Shape panels plot independently constructed coordinate counts; wide panels show recorded bounded outcomes.

Evidence: research/ecbench_leads_20261015/sessions/orbit-heldout; orbit-heldout.audit.json; failed-replays-v2.json; orbit-heldout.resources.json.
