# Run report: isomorphism-class census, p = 7 and p = 11

Study `research/smith_iso_granularity_20261015`, protocol frozen at `05f3d9203`. Host: EC2, Amazon Linux 2023, 2 vCPU, 7 GB, no isolation (L0); timings are descriptive only. Commands: `smith_iso_granularity --p 7|11 --out data`, then `smith_iso_granularity summarize --dir data 7 11`.

| **recorded** | **p = 7** | **p = 11** |
